I am a software engineer with 2 years of professional experience in projects. I have experience in developing plans, project management and user documentation

PROFESSIONAL EXPERIENCE

Back-end developer
at Q19
February 2024 - April 2024

My experience working on projects includes bug fixes, new API development, and successful teamwork. I am sure that my contribution to projects not only helps to achieve goals, but also contributes to improving the quality of the product. Teamwork has enriched my experience, improved my communication and collaboration skills.

DataFlow
2023
I was part of the development team that developed the No Code platform
for learning machine learning.
● - Role: Frontend developer of No Code machine learning platform.
● - Project Description: While participating in the Samsung Innovation
Campus hackathon, I developed the frontend part of an No Code
platform for machine learning using the Streamlit framework.
● My Accomplishments:
○ Creating a user-friendly UI for data loading and model
training
○ Integrating the frontend part with other components of the
platform.
○ Improved skills in frontend development and successful
team collaboration.
